

# STEELFLEX® WALK-ON PIT COVERS

**Application Notes:** Shown installation with 2-inch (5.08cm) square tubing bonded and riveted to stainless steel skin, 16-foot (4.9m) wide with a 50-foot (15.2m) travel. Air-operated take-up with brake mechanism ensuring safety when air is turned off. Aluminum tubing supplied with stainless steel end caps riding on brass railing mounted to sides of pit. Non-skid paint applied to top of cover protects against slipping hazard. Please consult A&A as wider and/or longer travel requirements can be easily accommodated.

# STEELFLEX® WALK-ON PIT COVERS

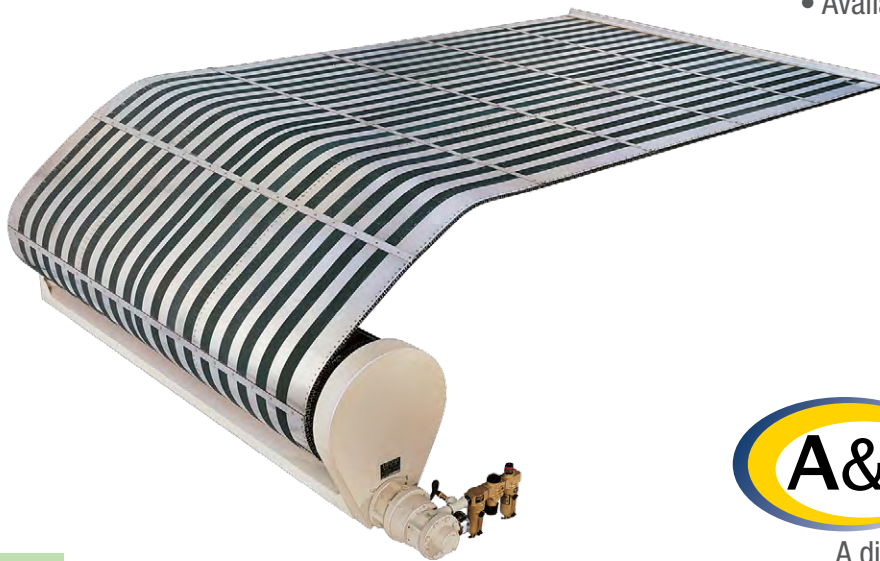

## Steelflex Walk-On Pit Covers

**Engineered and manufactured for maximum protection and maintenance-free operation**

Steelflex protects machine ways and ball screws from damage while covering pit opening for operator safety and machine accessibility. Using Steelflex walk-on covers to cover open pits eliminates the need for cumbersome sliding plates.

## Features

- Heavy-duty construction
- Safe and strong continuous stainless steel surface
- Air-operated motor for easy take-up
- Custom-designed to fit your machine or pit
- Impervious to hot chips, oils, coolants and other abrasives
- Available in any width and length
