

## For any technically feasible geometry: Moulded Way Wipers / Wipers for Linear Bearings

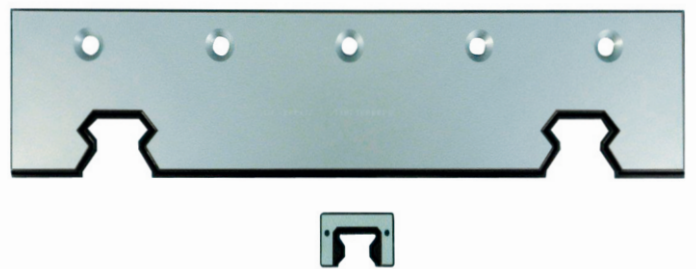

Moulded wipers are ideal if a complex geometry or entire series are needed.

Whether it is just one of a kind for prototypes or an entire batch – we manufacture to customers' specification, at attractive prices – and fast.

### Flexible choice of materials:

- Base material: steel or aluminum in various thicknesses.
- Standard elastomeres: either synthetic cautchouc or FKM (Viton®).

### New:

Self-lubricating, environmentally friendly LubriGuard wipers are now available as moulded wipers, wipers for linear bearings and in standard lengths. The capillary effect ensures that less lubricant is needed, fewer refills being required.
